

# Sweden

- 580 000 ha organic out of Sweden's 3 000 000 ha  
20%
- Just over 500 organic milk farms – and 50 000 dairy  
COWS
- 30% over-production? Almost no export, but SMP  
production is starting
- Arla 80% of the milk. 3 other big dairy companies
- Arla: 9 cent above conventional price = 42 cent
- All farms KRAV-certified

# Public procurement:

Objective today 25%

“Food strategi” – all political  
parties:2030 - 60%

“Organic is not relevant to consumers anymore”

# “Carbon-net-zero” 2050

- All Arla farmers reduce, together, 30% before 2030 - all farmers in 7 “Arla countries”

Organic milk farmers in Sweden **in front**, need to:

- use non-fossil fuel from 1/1-2022
- make a climate calculation and action-plan before 1/1-2021. To be revised every third year.
- Aim: Together reduce CO2 emissions with 10% in 5 years.
- In addition Arla climate compensates by supporting tree-plantations in East Africa.

# Threat?!

“Special milk” - Sweden

New Arla concept – almost the EU-organic regulation, except for feed

(Danish animal welfare concept - 2 hearts)
